1. Introduction

This document contains technical specification that provides the information necessary for software developers/engineers who intend to integrate ScoreMe APIs in any software application that would like to consume the API Gateway services.

This document describes the APIs exposed by ScoreMe Gateway and contains API endpoints with sample request data payload and sample response of API.

1.1 Pre-requisites

The REST APIs mentioned in this document use JSON notation for data exchange over HTTP.

Knowledge in above mentioned technical area is required before proceeding to rest of the document.

2. Resources & Formats

User of API services should have access to the system before proceeding to the rest of the document. Please contact your system administrator for getting user access.

2.1 URLs

API services use the following URL and associated parameters:

Table 1- URLs

Environment/ Module	Parameter	Value
Production	{BASE_URL}	https://sm-gst.scoreme.in/
Sandbox	{BASE_URL}	https://sm-gst-sandbox.scoreme.in/

2.2 Response JSON Format

All ScoreMe APIs return data as per following JSON object format.

Table 2- JSON Format for APIs

Parameter	Description
Data	JSON string of the data retrieved against an API.
resp_code	Returned response code from server.
resp_msg	Returned message string.

2.3 Date Time Format

Date/Time: All date times have to be passed in IST time zone in format "YYYY-MM-DD HH:MM:SS"

For example:

2021 August 18 11:34:56 PM = 2020-08-18 23:34:56

2021 August 20th 3:29:10 AM = 2021-Aug-20 03:29:10

3. Authentication & Authorization

3.1 Authentication: User Identity

User access is provided to bank/institution authorized personnel only. Please contact your administrator to get your access created in the system. Your email id would be your username for using API services.

3.2 Authorization: User Privileges

Please contact your administrator to get your access enabled for usage of API services.

3.3 Essential Header Parameters

All APIs take below information in the header part of http request.

Key	Value
ClientId	" <client id="">"</client>
ClientSecret	" <client secret="">"</client>
Sample ClientId	XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX
Sample	XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX
ClientSecret	

Note:

The values for clientId and clientSecret would be different for production and sandbox environments. Please contact your administrator to get correct values for clientId and clientSecret for the environment you are using.

4. API Gateway Services

The following sub-sections provide detailed, step-by-step instructions on how to use the various APIs provided by Gateway.

4.1 GST Through Email Link

Name	Description
Title	GST Generate API
URL	{BASE_URL}/gst/external/pwd/sendemaillink
Objective	To verify the GST report through Email link
Headers	clientId and clientSecret
Method	POST
URL Parameters	None
Data Parameters	{ "gstin":"<"Enter the GST number">, "email":<"Enter the Email"> }
Sample Request Payload	{ "gstin":["06AADCR2224H1ZQ"], "email":["payal.v@scoreme.in"] }
Sample Response Payload	<pre>{ "data": { "referenceId": "d1a4d9d6-c20f-4077-ad0b-3f9299af668e" }, "responseMessage": "Successfully Submitted.", "responseCode": "SRS016" }</pre>
Error Response	a. Incorrect Input { "data": { "responseMessage": "Incorrect Input.", "responseCode": "EIP018" } b. Blank Input Field { "data": null, "responseMessage": "Blank Input Field.", "responseCode": "EBF017" }

```
c. Payload is Incorrect.

{

"data": null,

"responseMessage": "Payload is Incorrect.",

"responseCode": "EPI022"
}
```

4.2 GST Analysis Request

Name	Description
Title	GST Request API
URL	{BASE_URL}/gst/external/pwd/gstanalysisrequest
Objective	To analyse GST request through Email
Headers	clientId and clientSecret
Method	POST
URL Parameters	None
Data Parameters	{ "gstin":<"Enter the GST number">, "username":<"Enter the Username">, "password":<"Enter the Password">, "from":<"Enter the Month & Year">, "to":<"Enter the Month & Year">, "linkFlag":<"Enter the flag 0 or 1", "tokenValue":<"Enter the token value">, }
Sample Request Payload	{ "gstin":["06AADCR2224H1ZQ"], "username":[""], "password":[""], "from":<"MMYYYY">, "to":<"MMYYYY">, "linkFlag":["1"], "tokenValue":["d1a4d9d6-c20f-4077-ad0b-3f9299af668e"] }
Sample Response	{
Payload	"data": { "referenceId": "5a3ceb3c-8af1-4617-a9a9-96a72903ef8f" }, "responseMessage": "Successfully Submitted.", "responseCode": "SRS016" }

```
Error Response
                       a. Payload is Incorrect.
                      "data": null,
                      "responseMessage": "Payload is Incorrect.",
                      "responseCode": "EPI022"
                       b. Incorrect Input
                      "data": {
                      "responseMessage": "Incorrect Input.",
                      "responseCode": "EIP018"
                       c. Blank Input Field
                     "data": null,
                     "responseMessage": "Blank Input Field.",
                     "responseCode": "EBF017"
                       d. Information Source is Not Working.
                     "data": null,
                     "responseMessage": "Information Source is Not Working.",
                     "responseCode": "EIS042"
                       e. Technical Issue
                     "data": null,
                     "responseMessage": " Unable To Process. Please Reach Out To
                   Support.",
                     "responseCode": "EUP007"
                       f. GST Number is not same
                     "data": null,
                     "responseMessage": "GSTINs entered cannot be same.",
                     "responseCode": "ENG034"
                       g. PAN is not same
                     "data": null,
                     "responseMessage": "PAN is not same for the GSTINs entered.",
```

```
"responseCode": "EPG044"
    h. Token is not match with GSTN
 "data": null,
 "responseMessage": "GSTIN in Token does not match with GSTIN in
Payload.",
 "responseCode": "EGM025"
    i. Token not exist
 "data": null,
 "responseMessage": "Token does not exist.",
 "responseCode": "ETN024"
    j. User name is not match with GSTN
 "data": null,
 "responseMessage": "The Username does not match with the GSTIN.",
  "responseCode": "EIG023"
    k. GST Report limit not exceed by 27 months
 "data": null,
 "responseMessage": "The requested months are more than the
allowed limit.",
 "responseCode": "ERT146"
```

4.3 GST Analysis Request using Link

Name	Description
Title	GST Request API using link
URL	{BASE_URL}/gst/external/pwd/gstanalysisrequestusinglink
Objective	To analyse GST request through link
Headers	clientId and clientSecret
Method	POST
URL Parameters	None
Data Parameters	{ "gstin":<"Enter the GST number">, "from":<"MMYYYY">, "to":<"MMYYYY">, "email":<"Enter the email id">}

```
Sample Request |
                   gstin":["06AADCR2224H1ZQ"],
Payload
                   'email":["payal.v@scoreme.in"],
                   'from":["012021"],
                   'to":["022021"]
Sample Response {
                     "data": {
Payload
                       "referenceId": "bb41c234-0817-4f36-be22-d31b50c5aef7"
                     "responseMessage": "Successfully Submitted.",
                     "responseCode": "SRS016"
                       a. Payload is Incorrect.
Error Response
                      "data": null.
                      "responseMessage": "Payload is Incorrect.",
                      "responseCode": "EPI022"
                       b. Incorrect Input
                      "data": {
                      "responseMessage": "Incorrect Input.",
                      "responseCode": "EIP018"
                       c. Blank Input Field
                     "data": null,
                     "responseMessage": "Blank Input Field.",
                     "responseCode": "EBF017"
                       d. Incorrect User Name & Password
                     "data":{
                     "jsonUrl":null,
                     "excelUrl":null.
                     "referenceId": "2cf2dd62-6e35-41f8-9bdb-5c9a584817f5"
                   'responseMessage":"Incorrect UserName Or Password.",
                   "responseCode":"EWC002"}
                       e. Information Source is Not Working.
                     "data": null,
```

```
"responseMessage": "Information Source is Not Working.",
 "responseCode": "EIS042"
    f. Technical Issue
 "data": null,
 "responseMessage": " Unable To Process. Please Reach Out To
Support.",
 "responseCode": "EUP007"
    g. Credential receive time limit (within 10 min) & link
       expired
 "data":{
  "jsonUrl":null,
  "excelUrl":null,
  "referenceId": "663ae79e-2c3f-4f5c-8fc0-e806e7d5355b"
 "responseMessage":"GSTINs credentials are not received within the
specified time period through link.",
 "responseCode":"ECN147"
    h. GST Number is not same
 "data": null,
 "responseMessage": "GSTINs entered cannot be same.",
 "responseCode": "ENG034"
    i. PAN is not same
 "data": null,
 "responseMessage": "PAN is not same for the GSTINs entered.",
  "responseCode": "EPG044"
    j. GST Report limit not exceed by 27 months
 "data": null,
 "responseMessage": "The requested months are more than the
allowed limit.",
 "responseCode": "ERT146"
```

4.4 Get GST Report API

Name	Description
Title	Get GST Response API
URL	{BASE_URL}/gst/external/getgstreport
Objective	To get GST report
Headers	clientId and clientSecret
Method	GET
URL Parameters	"referenceId"
Data Parameters	None
Sample Request	referenceId="5a3ceb3c-8af1-4617-a9a9-96a72903ef8f"
Payload	
Sample Response	{
Payload	"data": {

5. Validations for Payload

This section details the validations for each GST API that have been put in the system for the payload.

5.1 GST Through Email Link

a. GST Number

- ➤ GST number is a unique 15-character alphanumeric code wherein first two characters are states, next 10 character is user PAN number & last 3 characters is alpha numeric.
- No special characters allowed.
- It is case sensitive.

b. Email Id

- ➤ Part 1: Recipient name
 - Uppercase and lowercase letters in English (A-Z, a-z)
 - Digits from 0 to 9
 - Special characters are allowed.
 - A special character cannot appear as the first or last character in an email address or appear consecutively two or more times.
- > Part 2: Domain Name
 - Uppercase and lowercase letters in English (A-Z, a-z)
 - Digits from 0 to 9
 - A hyphen (-)
 - A period (.) (used to identify a sub-domain; for example, email.domainsample)
 - It must always start with @
- > Part 3: Top Level Domain
 - i. The last portion of the domain must be at least two characters, for example: .com, .org, .cc.

5.2 GST Analysis Request

a. GST Number

- ➤ GST number is a unique 15-character alphanumeric code wherein first two characters are states, next 10 character is user PAN number & last 3 characters is alpha numeric.
- > No special characters allowed.
- It is case sensitive.

b. User Name

- ➤ User Name should be 8 to 15 character, which should be start from alphabets.
- ➤ It should be alphanumeric.
- Only dot (.), underscore (_) & hypen (-) should be allowed
- ➤ It is case sensitive.

c. Password

➤ Password should be of 8 to 15 characters (where the minimum length is 8 characters and maximum length is 15 characters) which should comprise of at least one number, special character and letters(at least one upper and lower case).

d. To & From

- Date should be in "MMYYYY".
- Only numeric character should be allowed.

e. Link Flag

Link flag either 0 (User name & Password not blank) or 1 (User name & password is blank)

5.3 GST Analysis Request

a. GST Number

- ➤ GST number is a unique 15-character alphanumeric code wherein first two characters are states, next 10 character is user PAN number & last 3 characters is alpha numeric.
- ➤ No special characters allowed.
- ➤ It is case sensitive

b. To & From

- > Date should be in "MMYYYY".
- Only numeric character should be allowed.

c. Email Id

- > Part 1: Recipient name
 - Uppercase and lowercase letters in English (A-Z, a-z)
 - Digits from 0 to 9
 - Special characters are allowed.
 - A special character cannot appear as the first or last character in an email address or appear consecutively two or more times.
- Part 2: Domain Name
 - Uppercase and lowercase letters in English (A-Z, a-z)
 - Digits from 0 to 9
 - A hyphen (-)

- A period (.) (used to identify a sub-domain; for example, email.domainsample)
- It must always start with @
- ➤ Part 3: Top Level Domain
 - i. The last portion of the domain must be at least two characters, for example: .com, .org, .cc.

6. Webhooks

Webhooks are used to get the data/response automatically once it gets generated at the server. For this we would need an open URL of your application, for which our system will initiate the call to push message that POST request is complete.

System will make a POST request with following headers:

Key	Value
Content- Type	application/json
Access- Type	application/json
Sample Response	{
	"data": {
	"jsonUrl": "https://sm-gst-
	sandbox.scoreme.in/external/gstReportDownlaod?file=Reports/6
	ab4581d-2683-404c-ba3d-f1168cac2d0b_GstReport.json",
	"excelUrl": "https://sm-gst-
	sandbox.scoreme.in/external/gstReportDownlaod?file=Reports/6
	ab4581d-2683-404c-ba3d-f1168cac2d0b_GstReport.xlsx",
	"referenceId": "6ab4581d-2683-404c-ba3d-f1168cac2d0b"
	},
	"responseMessage": "Successfully Completed.",
	"responseCode": "SRC001"
	}

7. Troubleshooting & Support

7.1 Error Codes

The error messages are returned by the respective APIs. In case there are any system related errors like crash or network issues, then please refer to HTTP errors at https://www.w3.org/Protocols/HTTP/HTRESP.html. Still if the error persists then take a screen shot and note down the sequence of steps taken just before the error occurred and share the same with the helpdesk/support team.

7.2 Special Considerations

In case of any system or application failure, please do not try to fix the problem by yourself. Please do not delete any data from the system and reach out to support team immediately.

7.3 Support
